How to adjust your belt

Your included tool has two functions:

As a screwdriver:

When taken apart it is used as a screwdriver, to loosen and tighten the three screws holding the leather buckle attachment in place.

As a hole punch:

When put together, it is used to cut new 5mm holes in your belt.

You will need the following:

1) Cutting board

2) The screwdriver/hole punch tool

3) Match or lighter

4) Permanent marker

5) Sharp scissors

Take your belt apart:

1) Un-snap buckle attachment from back side of the belt.

2) Use your tool as screwdriver, remove the 2 snap-screws, (turn counterclockwise).

3) Also remove flat screw hiding under the belt loop. Press down firmly, turn counterclockwise.

Now your buckle attachment is dismantled, you are ready to adjust the length.

<u>List of parts:</u>

2X Snap-screws   1X flat screw   1X loop   1X leather buckle attachment

Fit the belt around your waist:

4) Run the dismantled belt through the loops of your pants, placing prong of buckle through the middle hole and tighten according to how tight you like your belt.

5) Mark the spot where base of buckle meets belt. Scratch with your nail or use a marker.

* This will be your cutting line.

6) Cut belt at marked spot.

7) Melt ends of stitching with match or lighter to secure.

8) Use permanent marker to darken end of freshly cut belt.

Cut new holes:

9) Place leather cutting tool into screwdriver, for cutting new holes in belt.

10) Use the piece just cut off as template to determine placement of new holes.

11) **Working on top of cutting board**, make 3 new holes, cutting through original holes in template.

Assemble belt again:

12) Remove hole punch tool from screwdriver and turning clockwise, tighten flat screw securing the belt loop.

13) Replace leather buckle attachment, tightening the snap-screws first by hand and thereafter with the screwdriver tool.

* Remember to check screws periodically, making sure they stay tight over time.

Now your belt is custom fit and need never be dismantled again.

The unique snap function of the leather buckle attachment, allows you to easily remove the buckle for safe storage, or effortless exchange of belt color or style.
